VIJAYAVARMAN ARUNASALAM HARIKRISHNAN

Rochester, NY | vijayavarmanah@gmail.com | linkedin.com/in/vijayavarmanah | vijayavarman09.github.io

EDUCATION

Master of Science in Cybersecurity
Rochester Institute of Technology, Rochester, NY ***GPA – 3.97/4.0*** ***Aug 2023-May 2026***

Bachelor of Engineering in Computer Science and Engineering
Meenakshi College of Engineering, Chennai, India ***GPA – 8.3/10.0*** ***Aug 2016-Apr 2020***

PROFESSIONAL EXPERIENCE

Rochester Regional Health, *Rochester* *Identity and Access Management Intern* ***Aug 2025-Present***

- Onboard privileged, service, and vendor accounts (100+ to date) within a 700+ safe, 9,000+ account CyberArk PAM environment, configuring safe permissions and coordinating password rotation with application owners
- Migrate privileged accounts identified through third-party security assessments into CyberArk PAM (500+ to date), while contributing to CyberArk EPM policy design, elevation workflow testing, and privilege reduction initiatives
- Develop PowerShell automation including a password reset notification system (30-200+ alerts/day) closing a communication gap, ad hoc AD reports, and bulk student provisioning (300+/semester) using existing scripts
- Resolve escalated Ivanti tickets for password resets, lockouts, and AD modifications through supervisor identity verification, and analyze Netwrix and Varonis logs to audit account activity and cleanup accuracy
- Support SailPoint ISC operations, managing account correlation, connector validation, and pre-onboarding verification for 80-120+ weekly hires to resolve provisioning discrepancies before start dates

Cognizant Technology Solutions, *Chennai* *Programmer Analyst Trainee / Analyst / Associate* ***Nov 2020-Aug 2023***

- Automated API and functional testing workflows using Selenium (executing 50+ test cases per release) and mentored 5 new team members to accelerate onboarding and team output

TEACHING EXPERIENCE

Rochester Institute of Technology *Teaching Assistant – Cryptography and Auth* ***Aug 2025-Dec 2025, Aug 2024-Dec 2024***

- Managed, graded, and provided feedback on Python and Java programming assignments covering cryptographic algorithms (Substitution Cipher, RC4, A5/1, MD5), using GitHub Classroom for submission and evaluation

Rochester Institute of Technology *Teaching Assistant – Introduction to Cybersecurity* ***Jan 2025-Aug 2025***

- Assisted 60+ students with lab sessions and assignments covering network security, risk analysis, access control, and system security, and graded 25+ assignments per term with detailed feedback

PUBLICATION

S. M. Maheen, I. Sultana, M. N. Fardous Zim, **V. Arunasalam Harikrishnan** and N. Kshetri, "ARTblock: Blockchain-Integrated AI for Real-Time Transaction Authenticity Verification in FinTech," *2025 International Conference on Electrical and Computer Engineering Researches (ICECER)*, Antananarivo, Madagascar, 2025, pp. 1-6, doi: 10.1109/ICECER65523.2025.11400953

PROJECTS

PQC-DEMS: Post-Quantum Cryptographic Digital Evidence Management System ***Apr 2026***

- Built a functional web-based forensic evidence management system implementing NIST-standardized ML-KEM-768 and ML-DSA-65 with RBAC, JWT auth, and a hash-chained audit log, benchmarked across file sizes up to 1GB
- Compared PQC and RSA across all operations confirming PQC superiority in key generation, signing, upload, and download while documenting RSA verification as 4 to 5x faster, a known lattice tradeoff

Legal Compliance Analysis for Breach Remediation ***Dec 2024***

- Analyzed a simulated healthcare data breach affecting 50,000+ individuals, mapping violations to HIPAA, PCI DSS, GDPR, GLBA, and NYDFS and applied NIST CSF 2.0 to propose a structured remediation roadmap
- Quantified regulatory impact across each violation including potential HIPAA fines up to $1.5M annually and GDPR penalties up to €20M, identifying supply chain over-privilege as a primary gap

Attack and Defend Exercise – Securing Corporate Infrastructure ***Apr 2024***

- Deployed a multi-service corporate network monitored with Wazuh and Snort, detecting 26,000+ security events and 2,900+ brute-force authentication attempts with zero successful logins during controlled attack simulations

CERTIFICATIONS

- CompTIA Security+ (SY0-701)
- eLearnSecurity Junior Penetration Tester (eJPT)
- INE Certified Cloud Associate (ICCA)
- Fortinet NSE 3 Certified in Cybersecurity

COMPETITIONS

- **NCAE Cyber Games 2025** – Finished 3rd among the top 12 teams from the East Overflow region
- **CyberSeed 2024 CTF** – Finished 23rd among 160+ teams after completing 87% of challenges

SKILLS

- **Identity & Access Management:** CyberArk PAM, SailPoint ISC, Active Directory, Ivanti, Azure AD/Entra ID, Varonis
- **Cloud:** Microsoft Azure, Amazon Web Services, Google Cloud Platform, Cloud Identity and Access
- **Languages & Development:** PowerShell, Python, C#, SQL, Java, Entity Framework, Azure DevOps
- **Security Tools:** Wireshark, Nmap, Metasploit, Snort, KQL
- **Frameworks & Standards:** NIST CSF 2.0, NIST RMF, HIPAA, PCI DSS, GDPR
